

Picazzo Set Top Box is one of the few STB products with Hong Kong based R&D. It offers unique set of features for Hong Kong digital TV broadcasting market. The key advantage of Picazzo STB is strong networking capability that it provide various value added feature that no similar products on the market. PITech develop the portal server “Picazzo.tv” to facilities the network enabled feature of Picazzo products. The portal site address is <http://picazzo.tv> and its mobile site <http://m.picazzo.tv>

The most famous add-on service is the remote recording function. It enable users to access EPG of digital-TV channels & NOW TV channels using any web browsers, and change recording schedule to their own STB at home. As long as a user has Internet access, he can control his recording schedule anywhere, anytime.

Another unique feature is YouTube video viewing. With Picazzo.tv portal, users can view YouTube video directly in his TV.
