

xThe project built a mobile portal server which transform news and articles on www.tdctrade.com for online and offline browsing. Besides common mobile devices, the system also supports Palm Doc format for offline browsing. User may login to the www.tdctrade.com to add articles to his own 'shopping cart', and he may synchronize the article to his own PDA when the PDA is plugged to a computer.

The mobile version can be accessed at <http://mobile.tdctrade.com> .
